

Preparing to outline

1. Place some newspaper on your table. On top of the newspaper put a blank sheet of white paper. This makes your work easier to see
2. Choose a 3 fold card with an oval or round cut out
3. Cut out a piece of foil bigger than your card
4. Decide if you want a scrunched or flat foil backing. If you want it scrunched, carefully scrunch up the foil then flatten out. If the foil tears start again
5. Open out your card and from the wrong side, mark the aperture size on the back of your foil
6. Add a margin around your drawn shape for a cutting line
